A320 Manual Engine Start

MANUAL STARTS - Manual starts are only performed on the ground. During start, the FADEC controls the igniters (A and B), the high pressure fuel valve, and the closure of the start valve. The FADEC monitors N1, N2, and EGT when N2 is below 50%. ECAM start fault detection is available, however, automatic abort and crank capabilities are not available.

Airbus A320 - ENG Start - DEMO

Assuming a "cold and dark" startup, the sequence is as follows - Check thrust levers are set to Idle, engine master switches are Off, engine mode selectors at Normal, parking brake set, gear selector Down (duh!), windshield wipers Off. Select both batteries On, press button to do APU fire test. APU master switch On, press APU Start.

How to start up an A320 - Quora

• Shut down the engine (MASTER switch set to OFF) • Do NOT press the ENG FIRE pushbutton • Crank the engine, by using either the bleed of the opposite the engine, the APU bleed, or external pneumatic power (Set ENG START selector to CRANK, then set the MAN START switch to ON). Do NOT use the ENG FIRE pushbutton, this would stop power to the FADECs, and would stop the motoring sequence.
