A General Theory Of Emotions

Theories of Emotion. The major theories of emotion can be grouped into three main categories: physiological, neurological, and cognitive. Physiological theories suggest that responses within the body are responsible for emotions. Neurological theories propose that activity within the brain leads to emotional responses.

Overview of the 6 Major Theories of Emotion

Founded upon the psychoevolutionary theories of Darwin, Plutchik and Izard, a general socioevolutionary theory of the emotions - affect-spectrum theory - classifies a wide spectrum of the emotions and analyzes them on the sociological, psychological and neurobiological levels.
