Concept 13.1 DNA is the Genetic Material 1. What are the two chemical components of chromosomes? 2. Why did researchers originally think that protein was the genetic material?

AP Biology Chapter 13 Reading Guide The Molecular Basis Of ...

Genetics is the scientific study of heredity and variation. Concept 13.1 Offspring acquire genes from parents by inheriting chromosomes Parents endow their offspring with coded information in the form of genes. Your genome is comprised of the tens of thousands of genes that you inherited from your mother and your father.
