Counseling | Cancer.Net

Our model for counselling cancer patients integrates a problem-solving approach within a person-centered, biopsychosocial framework. Unlike traditional prescriptive problem-oriented frameworks (D'Zurilla, 1986), this model focuses on the patient's experiences and resources.

A Model for Counselling Cancer Patients

Patton says that in his experience, cognitive behavior therapy (CBT), mindfulness and group work can be especially productive when working with clients who are dealing with cancer. CBT allows clients to explore their emotions and feelings without allowing those emotions and feelings to control everything, Patton says.

Fertility counseling of young breast cancer patients

There is no evidence to suggest that having counselling will help treat or cure your cancer. Nor is there any convincing evidence that it will help prolong your life. But there is a lot of evidence that counselling can help you to cope better with the many difficulties you face, during and after your cancer diagnosis and treatment.

How counselling can help | Coping with cancer | Cancer ...

Encouraging clients to attend support groups is another effective counseling strategy because, although cancer patients often will have the love and support of family and friends, many still feel isolated by their illness. Group work allows clients to interact with others in a similar situation, which can help address feelings of loneliness.
