A TMS system code is used by TMS to perform functions that user defined fields can't. For example, Problem Code 99 requires a user to enter completion comments before saving a work order. TMS relies on the system codes to function properly, so system codes can't be deleted. We suggest hiding system codes that you don't want to use.

TMS System Codes - Four Rivers Software Systems

I have added my CUCM 8.6.2 Cluster to TMS and appears to be all good. The problem is that when I check out the CUCM Managed Systems within TMS it reports an error thatthe EX90 running TE601 Software is using the incorrect provisioning as it is registered CUCM. I would like to book and push phone b...
