by wind, water, ice, or even animals. When these smaller pieces, called pebbles, sand, or soil, begin to move by natural forces, it is called erosion.

However, if you use a shovel to move rocks or soil, it is not erosion.

## **Bedrock to Soil**

Weathering and erosion generally go hand-in-hand but the two terms have subtly different scientific meanings.

Weathering is the name given to processes that change the surface material of the Earth as a result of exposure to the effects of water and the atmosphere.

Once overlying layers are eroded away and a rock is exposed at the surface, conditions change dramatically. Temperatures vary widely, and pressure is much lower. Reactive gases like oxygen and carbon dioxide are plentiful, and in many climates, water is abundant. Weathering can be characterized as mechanical (or physical), and
